## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 0 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 0 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office Patent Legal Administration at (703) 305-1383. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

### **DETAILED ACTION**

Receipt is acknowledged of RCE, filed on 12/18/2003, which has been entered in the file. Claims 1-6 and 10-23 are pending.

#### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/14/2003 has been entered.

#### ***Allowable Subject Matter***

2. Claims 1-6 and 10-23 have been allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or fairly suggest a product care label and a method for producing a product care label including a textile carrier having a plurality of visually recognizable care symbols and a plurality of transponders each being associated with a respective one of the care symbols, and each of the plurality of transponders being configured to transmit information on suitable care of a textile product to a corresponding household appliance, in combination with the other claimed limitations as set forth in the claims.

Applicant's argument that care symbols represent care instructions and Brewster et al teaches away from the user reading care instructions (see the third paragraph on

Art Unit: 2876

page 11 and continuing to page 12, of the amendment filed on 11/14/2003) has been found persuasive. The use of a care symbol (rather than a number, color, or hole punch pattern) with the system as taught by Brewster et al would be unnecessarily complicated for simply sorting articles and lead to the same problems regarding the use of care symbols as discussed in the background of applicant's specification.

Furthermore, since Brewster et al relates to sorting, there is no suggestion for the plurality of transponders to transmit the information to a corresponding household appliance. Thus, there is no motivation for one of ordinary skill in the art at the time of the invention to combine the prior art of record with the teachings of Brewster et al, to provide a care symbol associated with each transponder and the transponders being transmitting the information to a corresponding household appliance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Howard et al (US 2003/0229404 A1), Alsafadi et al (US 2002/0170952 A1), Yasutake et al (US 5,644,936), Wobkemeier (DE 197 47 152 A1), Birth (DE 101 44 667 A1), and Wobkemeier (EP 0 943 722 A1) all teach textile articles including a transponder.
